

## **Session-1 Lab**

1. Create a Book class with bookId, bookName and authorName. Create parameterized constructor to initialize the object. Create an ArrayList of type Book and store all book objects into collections and display all book details. [Hint: Use advanced for loop to display all Books details].
2. Write a Java program that calculates the sum of all even numbers present in an ArrayList of integers.
3. Write a program to reverse a given List of strings.
